-----	----	---------------

- | | | |
|-------------------------------------|-------------------------------------|--------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | User access policies are established. |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | Sensitive data (PII/SPII) is confidential/private. |
| <input checked="" type="checkbox"/> | <input type="checkbox"/> | Data integrity ensures the data is consistent, complete, accurate, and has been validated. |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | Data is available to individuals authorized to access it. |

Recommendations:

- Restrict access to authorized individuals only for internally stored data including PII and SPII
- Use encryption to ensure customer information is protected
- Install an intrusion detection system to detect and prevent incidents
- Create a disaster and recovery plan and create secure backups of data in the event of an incident so not all data is lost
- Update the password policy to meet current recommended minimum complexity requirements
- Ensure there is a centralized password management system that enforces password policies and makes it easier to reset and recover employee and vendor passwords
- Clarify and uphold legacy system maintenance and monitoring policies
